## Introduction

This document lists the enhancements and bugs relating to Kallik software products.

**Disclaimer:** Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

## 1. Enhancements

---

Reference #	Description
RQ744	In the phrase manager users can now have a Read Only view of content in locales that they cannot edit.
RQ710	The first release (more to come in 5.x) that allows for configurable and flexible approval processes
RQ691, IN2601 IN2750	Multiple additions and enhancements to available Web service Integration including Cancel Component for PLM Integration
IN2599	AMS now supports configurable Time Expired Session Keys for 3 <sup>rd</sup> party system access
IN2717	The initial task in the Asset Lifecycle has been enhanced and now includes the options to Forward, Approve and Reject
IN2778	Additional controls have been added to ensure date formats from external systems comply to the Kallik standard

## 2. Bug Fixes

---

IN2720	In the Asset Lifecycle the issue where a user was unable to see supporting documents on Select Asset Uploader task from ADM has been fixed
IN2769	In the Phrase Manager the case where a Phrase name changes were not saved during phrase administration has been fixed
IN2742	A bug where in some rare cases a user whose role is Asset Initiators would see that their artwork comments were not being saved has been fixed
IN2722	A bug that sometimes does not direct a user to the BI homepage has been fixed
IN2684	The bug where Clicking "update View" button twice causes search screen to not update has been fixed
IN2598, Client Ref 5179	There was a one use case that could cause a Thumbnail not to be created for an uploaded asset. This has been fixed
IN2442	The function for banners selection has been updated to allow for user uploaded images
IN2837, Client Ref 5234	The Jobs / Components that are 'Approved' but then cancelled at the printer stage now shown in the Job Selector
