Date	Revision	Change
13 th February, 2013	0.1	Provisional Release
18 th February, 2012	0.2	Reviewed, updated & released in Provisional Status
7 th May, 2013	0.3	Inserted all Enhancements from the build 5.0 which did not go into general release
8 th May, 2013	0.4	Updated remaining IN/RQs with required detail
5 th June, 2013	1.0	Final review and formal notification.

Introduction

This document lists the enhancements and bugs relating to Kallik software products.

Disclaimer: Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

Enhancements

Reference #	Description
RQ748	A new workflow has been created as an extension to the printer release workflow. The extension is to allow for the review and comment/approval of printer proofs
RQ843	A new concept known as “Composite artwork” has been introduced, this provides for an artwork to be created that contains data from multiple SKUS and Components
RQ723	The Artwork Data Manager task has now been split into two. Currently, if an ADM user creates an AAG artwork and it is not correct, the same ADM may not have the skills required to change the template or data set. This new functionality gives the ADM user the ability to delegate one or many components to a user with the new ADM Production role.
RQ708, IN2605	A major enhancement called “Batch Approval” has been introduced. This provides users with a new approval workbench which provides the ability to view compare and approves multiple artworks from one page. This enhancement has been designed to ensure compliance of rules relating to electronic signatures.
RQ739	Ability now to inform the user on how the artwork was created when editing an existing artwork.
IN2671	Continuing enhancements relating to browser compatibility.
IN2963	Permissions can now be set against a component in the project brief
IN3123	A Configurable option has been added into the Project Wizard. The system can now be configured so all users are set as deselected in the Project Wizard
IN3129	The HTML brief now contains a list of the contributors who were selected for the project
IN3160	From the Asset manager, it is now possible for a user to create a hi resolution JPG from the Artwork PDF
IN3159	Thumbnails of EPS file have now been enhanced to be representative of the file uploaded.
IN3130	If contributors have amended information that was previously contributed to a project, an e-mail notification is sent to the Artwork Data Manager.
IN3124	The format of the HTML layout has been enhanced so the data is presented in the same order as the project brief data fields.
IN2764	A new standard Icon has been added that will be associated by default when a template is uploaded
IN3050	In the Factory Artwork the title “Component Ref” has been amended to say “Component

	Code” so that it’s consistent with other AMS modules.
IN3049	In the history section of the Factory Artwork module the search feature has been amended so it is now possible to search based on SKU and/or Component Code.
IN3048	The Factory Artwork module the secondary barcode is generated automatically from a combination of lot and expiry fields. The field is now set to a read only view
IN3334, <i>Client Ref 5399</i>	BI - Updated the User Information Report to include associated Access Groups

Bug Fixes

Reference #	Description
IN3213, <i>Client Ref 5267</i>	PM - Where Used, the Results Folder option is now always present on the asset tracker screen, even after closing and opening the Search Criteria toggle panel.
