

Product release information

Product	AMS
Release number	V5.1.0083
Release date for evaluation	4th September, 2013
Release date for live deployment	5th September, 2013

Issue Date : 5th September, 2013
Author(s) : QA
Authorizer(s) : Product Manager
Issuer : QA

DOCUMENT HISTORY

Date	Revision	Change
4 th September, 2013	0.1	Initial draft to deploy to test environment.
5 th September, 2013	1.0	Updated and reviewed to reflect deployment to the Production Environment

Introduction

This document lists the enhancements and bugs relating to Kallik software products.

Disclaimer: Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

1. Enhancements

Reference #	Description
IN3278, <i>Client Ref 5316</i>	ADM - Bulk Component Completion (now possible to complete multiple components using checkboxes)
IN3572, <i>Client Ref 5608</i>	A distribution email can include a variable which identifies the phase (e.g. Asset Approval / Print Proof Approval).

Bug Fixes

Reference #	Description
IN3557	Workflow Manager now allows Print Proof Producers and Print Proof Managers to be able to see previous revisions of print proofs.
IN3541	Issue addressed and now fields populated via the ADM link to the project brief and then signed off, now appear in the BOM.
IN3569, <i>Client Ref 5607</i>	Child dependent fields in the Project Brief now show previously selected options when re-entering the brief.
IN3574, <i>Client Ref 5610</i>	Resolved issue where the asset name in the Asset Manager meta data could not be edited. Also merged IN3568 to improve AMS connection failures by a low level change to the AMS data source.
IN3577	Resolved issue where the Composite Artwork ADM import was failing.
