Date	Revision	Change
7 th March, 2014	0.1	Initial draft to deploy to test environment.
25 th March, 2014	0.2	Reviewed and published.
7 th April, 2014	0.3	Updated to include IN3933, IN4075, IN4113, IN4014.
9 th April, 2014	0.4	Minor low level change between builds V5.1.0332 and V5.1.0333 which does not impact the release content.
11 th April, 2014	1.0	Reviewed and published for deployment to the Production environment (V5.1.0335).

Introduction

This document lists the enhancements and bugs relating to Kallik software products.

Disclaimer: Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

1. Enhancements

Reference #	Description
RQ1035	AMS has been upgraded to support GS1 compliance standards
IN3252, <i>Client Ref 5268</i>	Enhancements have been made to the Where Used results screen that allows a user to search for specific results
IN3253, <i>Client Ref 5264</i>	Extra functionality has been added to the Where Used Search screen that allows a user to search on and find master artworks only
IN3795	Enhancements to the Service Integrator module to support creation and supply of extended data sets for labels
IN3914	Enhancements have been made to the Brief Manager to perform a validation at the final sign stage to verify that all "required" fields for GS1 compliant barcode creation have data present
IN4002, <i>Client Ref 5904</i>	Icons in the standard and batch workflows have been refreshed and realigned so they are consistent throughout.
IN3936	AMS has been upgraded to allow for the addition of a final page into a PDF containing approval audit information. This is a configurable option
IN3271, <i>Client Ref 5333</i>	As default, Locales are now shown in the same order both in the Project Brief and the ADM by default in the Project Brief and ADM in the order they are in the region.
IN3771, <i>Client Ref 5896</i>	The Asset Detail Number can now be displayed in the email body text for Approvals started from the ADM.
IN3773, <i>Client Ref 5897</i>	An Additional feature has been added to ensure the account manager can be notified if an artwork has been approved or rejected using batch approval functionality
IN4063	The AMS barcode selector has been enhanced to incorporate the creation of QR codes
IN4014	Selection of approvers in asset approval routes, for country grouped and locale grouped distributions, are now filtered by country/locale.
IN3933	A new configurable function has been introduced to provide the following. Once an artwork has been finally approved, a page containing a standard layout stating who approved the artwork and their reason for approval will be inserted as the last page of the artwork pdf

Bug Fixes

Reference #	Description
IN4068, <i>Client Ref 5974</i>	Brief Explorer - Issue whereby quote marks in the Project Name were causing searches in the Brief Explorer to fail have now been resolved.
IN4113	Merge of V5.2 fix into this release IN4141, <i>Client Ref 6007</i> Issue addressed where the user could not access the component job history on the Project History Screen and also the Back / Exit Buttons were not working.
IN4075, <i>Client Ref 5978</i>	An enhancement has been made to the to html brief accessed via the ADM so the Finished Goods Number will now be shown for jobs that have multiple components
