Introduction

This document lists the enhancements and bugs relating to Kallik software products.

Disclaimer: Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

1. Enhancements

Reference #	Description
RQ868	DAM - Information (i icon) to turn black in the Asset Manager if the Component is at the Project Brief stage (previously this was only if the Component was at the Artwork Approval Stage).
IN3069	BM/ADM - User now has the ability to remove languages not needed within a locale for a particular project, sku or component (locale restrictions).
IN4249	AMS - Improved performance of the Inbox containing high number of tasks (task thumbnails are now asynchronously loaded to reduce initial page load times).

Bug Fixes

Reference #	Description
IN3991, <i>Client Ref 6075</i>	BM - Resolved issue where the final sign off warning for a SKU was incorrect.
IN4295, <i>Client Ref 6089</i>	PM - TX Phrase Import Performance Improve when importing files with large volume of phrases.
IN4293, <i>Client Ref 6092</i>	SI - Service Notification Event Handler & Re-try Scheduler now synchronized (to avoid duplicate requests via the web service).
IN4281, <i>Client Ref 6033</i>	ADM - Resolved issue where the edit button was missing at the ADM stage (Field:PRODUCT_DESCRIPTION_TRANSLATIONS).
