|----------------------------------|-----------------|-------------------------|
| 22 nd September, 2014 | 0.1 | Initial draft. |
| 23 rd September, 2014 | 1.0 | Reviewed and published. |

Introduction

This document lists the enhancements and bugs relating to Kallik software products.

Disclaimer: Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

1. Enhancements

| Reference # | Description |
|--------------------------------|---|
| IN4825, <i>Client Ref 6374</i> | The Workflow Manager Route Engine Listener was reconfigured for the V5.2 clustered environment to allow for specific Application Servers to be enabled or disabled for this task. This ensures that routes are not manipulated by multiple workflow manager instances. |
| IN4790 | BI - Banner and style changes since upgrade to the reporting technology to support later browsers. AMS V5.2 now support IE9, IE10, Firefox 12+ and Chrome |
| RQ1024 | DAM - Scan TVS is a product developed by Globalvision that allows users to scan in a sample of printed material and compare this to a "Golden Sample". A report is produced that details any differences between the Golden sample and the scanned component. Scan TVS is a locally deployed application. |

2. Bug Fixes

| Reference # | Description |
|--------------------------------|--|
| IN4818, <i>Client Ref 6132</i> | BM - Phrase Editor now fits within the Window when called from within the Brief Manager. |
