Introduction

This document lists the enhancements and bugs relating to Kallik software products.

Disclaimer: Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

1. Enhancements

Reference #	Description
RQ1158	BI - as part of Kallik's ongoing improvements to the AMS system, we have upgraded the functionality of our Business Intelligence module to allow for improved performance, stability, usability and future expansion of functionality.
IN4561	Enhancement to allow form definition files to be configured to automatically load country symbol images from the asset manager into a project brief based on the project selling countries.
IN4048	The Brief Manager now allows support for local regulatory boxed phrases.

Bug Fixes

Reference #	Description
IN4945	Artwork containing QR barcode fails to send for approval or generate now resolved in the ADM.
IN5064	Issue resolved in the Resource Manager where users were unable to access tasks correctly due to a caching issue.
