<b>Product</b>	<b>AMS</b>
<b>Release number</b>	<b>V5.2.7</b>
<b>Release date for evaluation</b>	<b>03<sup>rd</sup> May 2015</b>
<b>Release date for live deployment</b>	<b>17<sup>th</sup> May, 2015</b>

**Issue Date** : 01<sup>st</sup> May, 2015  
**Author(s)** : QA  
**Authorizer(s)** : Product Manager  
**Issuer** : QA

### DOCUMENT HISTORY

<b>Date</b>	<b>Revision</b>	<b>Change</b>
01 <sup>st</sup> May, 2015	1.0	Reviewed and published.
14 <sup>th</sup> May,2015	2.0	Updated and reissued

## Introduction

This document lists the enhancements and bugs relating to Kallik software products.

**Disclaimer:** Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

## 1. Enhancements

Reference #	Description
RQ1039	The Asset Approval (Lifecycle) module has been revised and re developed. The redevelopment exercise was undertaken to:- <ul style="list-style-type: none"> <li>• Bring the module into line with the look and feel of the rest of the AMS suite</li> <li>• Provide an improved user experience by making the module simpler to use and more intuitive</li> <li>• Provide a more feature rich application</li> </ul>
IN5249, IN5379, IN5332	An HTML5 version of the Annotations mark-up tool has been implemented. This function will mean users will not have to have Java installed to run the tool. This is a selectable option at the moment so users can chose whether to run in Java or HTML5 mode
IN4114, <i>Client Ref 6011,6530</i>	An enhancement has been made in the Phrase explorer module so a user can now search on content within phrases as well as the phrase name
IN4882, <i>Client Ref 6457</i>	In the project brief it is possible to have mandatory fields, ie fields that have to be populated before a project can be signed off. This functionality has been further enhanced so extra checks are carried out across Project SKU and component level
IN5177, <i>Client Ref 6858</i>	In the Brief Overview section of the Project brief(Manuscript) users have an option to generate an Advanced report. The advanced report can be configured to client requirements e.g if there is a corporate style. Extra functionality has been developed that allows that document to be uploaded against the project and used as a supporting document.
IN5046, <i>Client Ref 6522</i>	When starting a project from a results folder the system splits the draft projects into a default amount of components per project - currently this is set as 50. It was highlighted that sometimes, components belonging to the same SKU were being split. This has now been changed so components belonging to the same SKU will be kept together as much as possible. The fix will work as per the following example. If we have 60 components spread across three skus, sku a with 40, skub with 12 and sku c with 8, and a maxArtworksPerProject limit of 50, the code will create two projects, Project1 containing sku a with all 40 component and sku c containing 8 components, with Project2 containing the remaining 12 components in Sku b.
IN5043, <i>Client Ref 6633</i>	An enhancement has been added so an e-mail notification can be sent after the final approval has been done in AMS.
IN5286, <i>Client Ref 7047</i>	An enhancement has been added so an email at the end of the process goes to the ADM. This will indicate the print activity is complete and this will be their prompt to close the component.
IN5353, <i>Client Ref 7015</i>	In the BI module there is a report that allows the user to see a list of brands for their company. This has been further enhanced so associated sub brands can be viewed.
IN5352, <i>Client Ref 7011</i>	The User Information report has been modified to include task groups assigned to a user.
IN5184, <i>Client</i>	A more obvious notification has been introduced to show if SKUs or components are

<i>Ref 6868</i>	disabled.
<i>IN5289, Client Ref 7104</i>	The Annotations Summary report has been combined into one report that contains both General comments and post it note comments
<i>IN5182, Client Ref 6866</i>	An enhancement has been introduced so if users leave the project brief without saving or publishing changes a warning message is displayed.
<i>IN5054, Client Ref 6214</i>	An improvement has been made so the annotations an comments report can be opened in a separate window to make it easier for users to see the comments.
<i>IN5358, Client Ref 7202</i>	An enhancement has been made to the component status reports to include tasks for users of the Asset Approval Functionality

## Bug Fixes

---

<b>Reference #</b>	<b>Description</b>
<i>IN5318, Client Ref 7167, 7210</i>	An issue was detected where clicking on the more button in the audit history was not expanding to show more information. This has been rectified.
<i>IN5300, Client Ref 7136</i>	An issue was reported where the advanced reports generated in the Manuscript (project brief) did not display rich text formatting (Bold, Italic etc) correctly. This has been rectified
<i>IN5262, Client Ref 6816</i>	An issue where a mouse over tooltip was covering the reject button has been addressed
<i>IN5037, Client Ref 6610</i>	The issue where archived SKUs were being shown as in progress has been rectified
