

Product release information

Product	AMS
Release number	V5.2.0490
Release date for evaluation	29th March 2015
Release date for live deployment	12th April, 2015

Issue Date : **09th April, 2015**
Author(s) : **QA**
Authorizer(s) : **Product Manager**
Issuer : **QA**

DOCUMENT HISTORY

Date	Revision	Change
19 th February, 2015	1.0	Reviewed and published.

Introduction

This document lists the enhancements and bugs relating to Kallik software products.

Disclaimer: Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

1. Enhancements

Reference #	Description
IN5209, <i>Client Ref 6876</i>	A request was made to enhance functionality associated to using country symbols. It is now possible to have country symbols automatically selected by language rather than country. As an example, if a user was to choose Mexico, the symbol would be ESP for Spanish
IN5197, <i>Client Ref 6883</i>	A new function has been introduced that allows a user to copy SKUs and their associated components or to copy components in a project
IN5123, <i>Client Ref 6662</i>	An enhancement has been introduced to improve performance when using the reassign button in the workflow
IN5248, <i>Client Ref 6705</i>	Improvements have been made to the Route Selection function in the workflow manager to make it easier to use
IN5253, <i>Client Ref 7043</i>	A change has been made to the search methodology in the Factory Labeling module so it is now possible to search for an exact match.
IN5290, <i>Client Ref 7105</i>	A change has been implemented to show component type and component number on the History screens, Brief screen and Project brief documents.
IN5231, <i>Client Ref 6935</i>	The system has been enhanced so if components with the same name are imported via the import tool, a new placeholder will not be created.
IN5222, <i>Client Ref 6914</i>	Improvements have been made to the search functionality in the batch processor tool.
IN5235, <i>Client Ref 6952</i>	An improvement has been made so a “processing” message is displayed when the batch processor is working through files.
IN4963, <i>Client Ref 4962</i>	Functionality has been enhanced within the brief manager to provide the ability to copy information contained in dynamic fields

Bug Fixes

Reference #	Description
IN5133, <i>Client Ref 6736</i>	As part of a client configuration, it is possible to set a limit for the number of components that can be incorporated into a project. However there was no visibility of number of components when creating a project. An enhancement has been introduced so the number of components is displayed and also a notification is displayed if the number of components being added is approaching the limit
IN5239, <i>Client Ref 6618</i>	The issue reported where an inspection report couldn't be attached for a batch approval has been addressed
IN5252, <i>Client Ref 6967</i>	An issue was reported that the Audit Trail report was occasionally showing spurious results, this has been resolved.
IN5188, <i>Client</i>	The reported issue where pick list values were not supported during an import has been

Kallik product release information

<i>Ref 6873</i>	addressed.
<i>IN5232, Client Ref 6969</i>	Improvements have been made to the page refresh function in the batch processor
<i>IN4820, Client Ref 6845</i>	An issue was reported where a lack of response was observed when clicking icons in the workflow manager. This has been addressed
