Introduction

This document lists the enhancements and bugs relating to Kallik software products.

Disclaimer: Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

1. Enhancements

Reference #	Description
Phase 1 Deployment to Non production Server - 6th June 2015	
RQ1156	The ADM Module has been restyled to make it consistent with the rest of AMS 360
RQ762, RQ112	The Asset manager has been redesigned and reengineered to meet the following objectives <ul style="list-style-type: none"> • Bring the Asset manager in to line with new UI styling • Improve user experience • Improve functionality • Simplify interaction
RQ762	As part of the Asset manager redevelopment the file upload function has been enhanced to allow for uploading of multiple assets and also to allow users to utilise drag and drop functionality
RQ762, <i>Client Ref 5955</i>	A request was made to make it easier to identify country Specific IFUs. A change has been made so an extra attribute, for example sub brand, can be displayed on information under the asset thumbnail.
RQ1139, RQ1135, RQ1138	Updates to AMS tools further improve the underlying functionality and further increase robustness of the application.
RQ1184	The Factory Labelling module has be redesigned and reengineered to meet the following objectives <ul style="list-style-type: none"> • Bring the Factory Labelling in to line with new UI styling • Improve user experience • Improve functionality • Simplify interaction
IN5261, <i>Client Ref 7030</i>	An enhancement has been made so the template name used on an artwork is shown in the Assets Attributes screen
IN5333, <i>Client Ref 7196, 6855</i>	The Asset Lifecycle function has been updated to all users to include a reason for change in the audit log and the metadata.
Phase 2 Deployment to Non production Server - 20th June 2015	
IN4487, <i>Client Ref 6989</i>	Improvements have been made to read only fields so it is more obvious the content is read only and content cannot be edited
IN5285, <i>Client Ref 6964</i>	The QA good inwards inspection report has been upgraded so it can now contain the LOT number for the product and the date of the inspection exercise
IN5293, <i>Client Ref 7049</i>	The ScanProof (ScanTVS) IN function used for goods inwards inspection has been enhanced so users can search on component number, component name and keywords.
IN5179, 5467	An enhancement has been made to provide improved information on projects that contain

<i>Client Ref 6863</i>	stale assets - this will be in the form of a report that details projects using a stale asset
<i>IN5287, Client Ref 7094</i>	In the Brief manager under the Brief Overview tab a user has the option to generate a document using the Advanced option. This option allows collated brief content to be displayed to a client specific layout. Generated results are displayed in a jobs table and this has been enhanced so the document file name is shown in this table
<i>IN5317, Client Ref 6264</i>	An enhancement has been made to the stale asset update feature. This now means that all assets within a certain type (eg templates) can be updated in one go
<i>IN5175, Client Ref 6856</i>	If a project contains stale data, the icon will change to make it easier for a user to spot.
<i>IN5286, Client Ref 7047</i>	An enhancement was requested to provide a notification to the ADM upon completion of print activity. This has been incorporated so at the end of the process an email goes to the ADM which will say print activity complete so the user is prompted to close the component.
<i>IN5135, Client Ref 6742</i>	An enhancement has been made in the project Wizard so the ability to add new SKUs and components is controlled by a role and is not general to every user who can start a project
<i>RQ763</i>	Introduction of a Print Proof Approval process KPI report
<i>IN5187, Client Ref 6871, 6220</i>	An enhancement has been made so it is possible to see an annotations summary report for previous versions of artworks
<i>IN5185, Client Ref 6869</i>	A new feature has been introduced to allow users to conduct find and replace exercises in the project brief. This was specifically introduced so users could change terminology as an example, find any phrase with Doctor in and change to Physician.
<i>IN5178, Client Ref 6860</i>	An improvement has been made to the ADM page so it is now possible to click on a “view tasks” link for a component. Clicking on the link will open a window that shows who has tasks for that component and who has completed tasks for that component
<i>IN5176, Client Ref 6857</i>	An enhancement has been added to provide extra information for artworkers to help them know what content has changed from the last time the artwork was produced. This will take the form of a brief document that will show fields that have been updated since the last process initiation.
<i>IN3272, Client Ref 5317</i>	A change has been made for password prompts so the cursor is automatically placed in the username and/ or password field and the user can hit the return button instead of clicking ok.
<i>IN5344, Client Ref 6887</i>	The batch approval function has been enhanced so users have the ability to add batch comments to selected artworks.
<i>IN5331, Client Ref 7067</i>	The Annotations Summary Report has been enhanced so the component code appears in the header.
<i>IN5491, Client Ref 7351</i>	An enhancement has been made to improve the ability to place barcodes using the Cascade plug in

Bug Fixes

Reference #	Description
<i>IN5042, Client Ref 6491</i>	The asset lifecycle function has been amended so documents can be uploaded at other points in the process, not just when the process is initiated
<i>IN5282, Client Ref 7053</i>	An issue that was detected where a System Unavailable message was displayed at the end of an asset approval has been addressed in the new version of the Asset Lifecycle tool
<i>IN5405, Client Ref 7295, 7299</i>	An extra function has been introduced into the invalid code checker so if invalid codes are used, such as a comma in a component name, the system will flag this up as an issue
<i>IN3517, Client</i>	An issue was highlighted where in certain cases the aliasing was not showing in the

<i>Ref 5550</i>	workflow manager screens. This has been corrected
<i>IN5219,Client Ref 6889</i>	There were some reported issues on the Users Open Tasks report which have been addressed
<i>IN5435,Client Ref 7265</i>	A problem was reported where mail notifications weren't available for the final approval/rejection task has been amended so a notification will now be sent.
<i>Client Ref 7345</i>	A minor issue where the Draft Save function was unavailable has been addressed
<i>IN5527,Client Ref 7355</i>	Some exceptions were reported in the project brief. These have been reviewed and addressed.
<i>IN5546,Client Ref 7451</i>	An issue was identified on the translation Status report where not all translated fields and blank fields were being shown. This has been addressed.
