

## Product release information

<b>Product</b>	<b>AMS</b>
<b>Release number</b>	<b>V5.3.0117</b>
<b>Release date for evaluation</b>	<b>16<sup>th</sup> August 2015</b>
<b>Release date for live deployment</b>	<b>29<sup>th</sup> August, 2015</b>

**Issue Date** : 21<sup>st</sup> August, 2015  
**Author(s)** : QA  
**Authorizer(s)** : Product Manager  
**Issuer** : QA

### DOCUMENT HISTORY

<b>Date</b>	<b>Revision</b>	<b>Change</b>
11 <sup>th</sup> August, 2015	1.0	Issued for review
20 <sup>th</sup> August 2015	1.1	IN5700 & IN5710 added to final release
27 <sup>th</sup> August, 2015	2.0	Update with final build number

## Introduction

This document lists the enhancements and bugs relating to Kallik software products.

**Disclaimer:** Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

## 1. Enhancements

Reference #	Description
RQ1323	Enhanced functionality has been introduced into the ADM so users can group fields for artwork being produced using the semi-automated option. The grouped fields will be passed through to the cascade xml file which can then be imported into Adobe Illustrator
IN5327, <i>Client Ref 7078</i>	When uploading a printer file, the Brand will automatically be set with the File Upload dialog providing an option to set the Sub-Type using a drop down list
IN5494, <i>Client Ref 7403</i>	An enhancement has been made to AMS which allows names for inbox tasks to be configured on a per client basis. Clients will have to request changes from Kallik support and the request should be in the format listed below.
IN5495, <i>Client Ref 7404</i>	The Asset Detail number has been added to the Metadata screen for Workflow Manager and Annotations Summary report
IN5630, <i>Client Ref 7508</i>	A report exists that allows users to see new versions of assets. An enhancement has been made to add extra filters to the report so users can filter on different asset types.
IN5553, <i>Client Ref 7498</i>	An enhancement has been made to the asset preview button in the workflow manager so the asset is now only previewed and not downloaded
IN5482, <i>Client Ref 7357, 7523</i>	It was highlighted that there were some inconsistencies in the date format across the AMS modules. This has been improved to make the date format consistent.
IN5346, <i>Client Ref 6210</i>	The project notes email function has been enhanced so ADM users can also be selected so they can be copied in on project notes if applicable
IN5137, <i>Client Ref 6739, 7107</i>	An enhancement has been made in the task inbox so if a user selects a set number of items to view then this setting will be remembered should the user navigate away and back to the inbox
IN5343, <i>Client Ref 6207</i>	Upload files functions for uploading artworks and files via the file manager task will now display the component code
IN5605, <i>Client Ref 7421</i>	An enhancement has been introduced to allow metadata fields to be included in e-mail body content. This can be configured by client AMS Administrators
IN5371, <i>Client Ref 7177</i>	The user can select the number of items per page for displaying a number of phrases in the phrase manager. The system has been enhanced so this setting is remembered and maintained.
IN5556, <i>Client Ref 7482</i>	An enhancement has been made so that when the user launches the asset or phrase selector they can see which field it was launched from.
3544, <i>Client Ref 7233</i>	When an automated artwork is rejected the annotations summary report opens in a new tab so that this can be kept open whilst making the changes. This functionality is now present for the Approval Comments.

IN5461	A welcome tutorial has been created for the asset manager so first time users can take a tour around the asset manager functionality

## Bug Fixes

Reference #	Description
IN5543, <i>Client Ref 7363</i>	The issue detected where project data was missing in the project brief when creating composite artworks has been rectified
IN5634, <i>Client Ref 7407, 7560</i>	A change has been made to prevent actions from the sub menu in the workflow manager being submitted more than once
IN5095, <i>Client Ref 6682</i>	A problem was detected where the status of a task displayed in the approval process was out of sequence with the actual status. This has been rectified.
IN5330, <i>Client Ref 7153, 7075</i>	It has been highlighted that some special characters were causing the system to crash when being entered into data fields. The issue has now been rectified.
IN5122, <i>Client Ref 6619</i>	Occasionally batch approval tasks would open up an empty screen. This problem has been addressed.
IN5555, <i>Client Ref 7475</i>	An issue was detected whereby stale assets at component level were not updating properly. This has been addressed.
IN5557, <i>Client Ref 7484</i>	The Approval history report used to be available from the Phrase Manager. This option has now been removed as it is not relevant to this module.
IN5554, <i>Client Ref 7476</i>	A tooltip was missing from the search field in the asset manager. This has been added back in.
IN5150, <i>Client Ref 6766</i>	It was noted that the side scroll bar disappeared if the user zoomed in the browser. This has been improved
5617, <i>Client Ref 7538</i>	A specific scenario resulted in an inaccurate number of results being returned when searching by Type. This is resolved.
IN5700	An error scenario was possible when the company configurable alias value for 'Asset Details No.', replaced the current field name of 'Reference'. This has been rectified.
IN5710	Link to the comments summary report is not displayed if only comments are present

## Appendix

IN5494 / nService 7403

An enhancement has been made to AMS which allows names for inbox tasks to be configured on a per client basis. Clients will have to request changes from Kallik support and the request should be in the format listed below.

----- Example format of a request to modify inbox task data -----

Company number:

Where in the order of the fields the customer requires it: (e.g. field 'Sub-Type' should display in column 3)

Field required (from selection below): (e.g. Sub-Type)

----- End of example request -----

----- List of fields that can be requested -----

Job

Job Reference (Project Name)

Job Description (Component Code)

SKU

Type

Sub-Type

Brand

Version

Region

Printer Company Name

Keywords

Reason

Asset No

Asset Detail No

Asset Detail Id

Name of Attribute

----- End of list of fields that can be requested -----

Note: there may be instances where the data specified is truncated in which case the information will not be visible to the user. The data will be truncated at 1024 characters and 'Reason' and 'Keywords' fields are likely to contribute significantly to this. Please consider this when deciding which fields should be included.
