

Product release information

Product	AMS
Release number	V5.3.0323
Release date for evaluation	24 th January 2016
Release date for live deployment	7 th February, 2016

Issue Date : 27th January, 2016
Author(s) : QA
Authorizer(s) : Product Manager
Issuer : QA

DOCUMENT HISTORY

Date	Revision	Change
18 th December, 2015	0.1	Internal review
08 th January 2016	1.0	Customer release
27 th January 2016	1.1	IN5814 added, updated live release date

Introduction

This document lists the enhancements and bugs relating to Kallik software products.

Disclaimer: Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

1. Enhancements

Reference #	Description
IN1182, nService 4402, 6056	Enhancement to current functionality to provide the ability to copy SKU/Component data in Project Brief
IN5757 nService 7727	When new versions and new variations of assets are uploaded the user is taken to the 'report screen' where the user can enter mandatory (and other) meta data. Reason for change is now required to be entered only once per asset, this info is transferred between tabs on metadata screen

Bug Fixes

Reference #	Description
IN5868 nService 8052	An issue was detected where Sequenced image Fields were causing issues when data exists at multiple levels. This has been resolved.
IN5838, nService 7853	The "What's Changed" report has updated to support multi-pack projects.
IN5847, nService 8063	An issue where double clicking upload button can cause duplicated asset versions has been rectified.
IN4980, nService NA	When clicking on the Barcode preview function, a progress indicator is now shown
IN5863, nService 7771	The Component Status report has been amended to show correct dates irrespective of time zone
IN5875, nService NA	Exit dialogue is now shown when making changes to Brief e.g. Due Date and Component Table. Draft save is now not automatically done for date fields, only image/phrase selectors.
IN5857, nService 8087	Double clicking OK button no longer results in duplicate draft projects being created
IN4065 nService 6566	Full asset lock details can now be seen in the Project Wizard and Component Import screen
IN5682 nService 7769	It was noted that the Date format was incorrect when using Date Picker. This has been rectified
IN5876 nService 8126, 8140	A specific sequence of characters in the asset name caused an issue in rendering approval history and management screens, this has been rectified
IN5851 nService 8076	A specific scenario whereby a forwarded printer task caused an error has been rectified
IN5887 nService 8148	The time allowed for very large system searches has been increased so the system will not time out
IN5853	In Review Artwork users' sticky note comments can now be seen by other users by double clicking the comment
IN5705, nService	In the Factory Labelling module, a scroll bar introduced for smaller screen resolutions

7533	
IN5755, nService 7618, 7693	Files downloaded from the Asset Manager will no longer be pre-fixed by the Repository ID. However duplicate file names will have (1), (2),etc., appended as appropriate
IN5901, nService 7638	An intermittent issue in Phrase Manager resulted in an error condition in certain circumstances has been rectified
IN5837, nService 8083	Component Status report now shows custom field value for multi-packs (composite SKU/composite component)

Appendix

IN5814, nService 7337, 8009	An issue was discovered where content that was either placed within a clipping mask or included Overprint and Transparency would fail to render correctly within the viewer, this has been resolved. This change is configurable and will be made available to clients as per separate communication.
