

## Product release information

Product	AMS
Release number	V5.3.0425
Release date for evaluation	28 <sup>th</sup> February 2016
Release date for live deployment	13 <sup>th</sup> March, 2016

**Issue Date** : 14<sup>th</sup> March, 2016  
**Author(s)** : Software Development Manager  
**Authorizer(s)** : Product Manager  
**Issuer** : Software Development Manager

### DOCUMENT HISTORY

Date	Revision	Change
25 <sup>th</sup> February, 2016	0.1	Internal review
25 <sup>th</sup> February 2016	1.0	Customer release
11 <sup>th</sup> March 2016	1.1	IN6003/nService8365 added

## Introduction

This document lists the enhancements and bugs relating to Kallik software products.

**Disclaimer:** Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

## 1. Enhancements

Reference #	Description
IN5871, nService 8017	Users can now optionally identify group tasks via email notification. See Appendix for description.
IN5366, nService 7198	The collation route has been added next to relevant entries in the Audit summary report

## Bug Fixes

Reference #	Description
IN5828, nService 7946	A fix was made to ensure that annotations added to an artwork within the Daeja browser have the correct date and time for that specific annotation. This fix applies to both applet and HTML5 implementations of Daeja
IN5953	A change was made to allow multi page artwork to be rendered in Daeja whilst using overprint and mask techniques
IN5549, nService 7954	Phrase Explorer no longer partially obscures the last entry when a certain number of entries is reached
IN5831, nService 7688	Data which becomes stale for the Country of Origin field is now updated correctly
IN5794, nService 7826	Sentences that were longer than 160 were truncated in the UI and persisted in the Audit Log. The original text is now persisted in the audit log rather than the truncated version which is displayed
IN5932	Harmonisation of the error messages in dual authentication has been done. Error messages will now read 'Invalid username or password' for dual authentication and 'Invalid Password' only for single authentication.
IN5973, nService 7533	On batch generation screen there is now a scroll bar in the centre section which comes into effect when there are sufficient labels
IN5968, nService 8309	Read only status for composite artworks is now set and in effect in ADM
IN6003, nService 8365	The content of an annotation can now be seen by hovering over an annotation

## Appendix

IN5871, nService 8017: Modify the relevant distribution email template with the following entry - '`{distribution.type}` (Distribution Type)' in Resource Manager. Distribution types are: Default, Grouped, Country Grouped, Locale Grouped
