

Product release information

Product	AMS
Release number	V5.3.0822
Release date for evaluation	27th August, 2016
Release date for live deployment	1st October, 2016

Issue Date : 26th August, 2016
Re-Issue Date : 26th September, 2016
Author(s) : Software Development Manager
Authorizer(s) : COO
Issuer : Software Development Manager

DOCUMENT HISTORY

Date	Revision	Change
26 th August, 2016	0.1	Internal review
26 th August, 2016	1.0	Customer release
21 st September, 2016	1.1	IN6375, IN6347, IN6283, IN5998, IN6461, RQ1477, RQ1722, RQ1718, RQ1719

Introduction

This document lists the enhancements and bugs relating to Kallik software products.

Disclaimer: Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

1. Enhancements

Reference #	Description
IN6378, nService 9027	Enhanced field/attribute mappings when creating an approval task in the ADM screen
IN6346, nService 8633	Images provided from an external system can now be accepted using a file name and not just a URL
IN5849, nService 7858	Several amendments made to standard project brief reporting
RQ1477	Performance improvements to AAG load balancing have been made. This is configurable per customer
RQ1722	Functionality has been implemented to allow triggering of file exports from ADM to allow for print tests
RQ1718	Functionality has been implemented to allow users with particular roles to batch start projects based on a component list in a results folder
RQ1719	Functionality has been implemented to allow users with particular roles to batch update specific stale data in projects

Bug Fixes

Reference #	Description
IN6406, nService 9152	A container parsing issue identified in the ADM was resolved
IN6380, nService 9076	The order in which locales are selected from the 'Available' to 'Selected' lists in Resource Manager are now maintained
IN6246, nService 8437	The performance of the Phrase Manager import process has been improved for the following reasons: <ol style="list-style-type: none"> 1. Prevent user updates whilst the system is synchronising data between user system and server 2. Increase the performance of the Save operation with large volumes of data 3. Improve the re-render speed
IN6375, nService 9027	A modification was made to RM to ensure that new companies date formats were in compliance with existing formats
IN6347, nService 8995	Additional data is now included in the synchronisation of translation field values to ensure that when translations are auto-populated there is no duplication of data
IN6283, nService 8859	Certain dialogue boxes with a pre-populated field did not enable the OK button until the dialogue box was moved, this has been resolved.
IN5998, nService 8371	A specific situation could occur where a completed task would remain in the user's inbox, this has been resolved.

Appendix

IN6461 contains further modifications and improvements to the new Factory Labelling module.
