

Product release information

Product	AMS
Release number	V5.3.10
Release date for evaluation	19 th December, 2016
Release date for live deployment	22 nd January, 2017

Issue Date : 19th December, 2016
Re-Issue Date : NA
Author(s) : Software Development Manager
Authorizer(s) : COO
Issuer : Software Development Manager

DOCUMENT HISTORY

Date	Revision	Change
19 th December, 2016	0.1	Internal review
19 th December, 2016	1.0	Customer release
10 th January, 2017	1.1	IN6521, IN6515, IN5420, IN6296, IN5907, IN6650

Introduction

This document lists the enhancements and bugs relating to Kallik software products.

Disclaimer: Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

1. Enhancements

Reference #	Description
IN6293, nService 8716	A user can now include a message when routing artwork for approval. The email template will require updating with \${route.instruction}
IN5874, nService 8073	A change has been made so the user uploading the artwork into the asset manager is now shown as the artworker who uploaded the artwork, and not the final approver
IN6302, nService 8711	The user description field is included to identify the user for country grouped tasks
IN6483, nService 9294	The local timezone of the user is now used when signing on via Single Sign On, rather than server time. This is configurable
IN6221, nService 8721	Ad-hoc tools added to each column in the Approved Artworks report to allow filtering
RQ2041, nService 8722	The results from running a Where Used report can now be exported
IN6303, nService 8720	Component Supplier and Component Supplier Dual are now mapped to the Asset Manager metadata. Customer configured
IN6515	The Brief Explorer project management screen UI has been refreshed in line with other AMS modules
IN5907, nService 8158	There is now a check box to allow Guest accounts to be included in the User Information report
IN6296, nService 8709	Project Wizard maintains the order of languages as specified in the Resource Manager

IN6650	A modification was made to 3 rd party access to Factory Printing to allow persistence of changes to print-related data
--------	---

Bug Fixes

Reference #	Description
IN6218, nService 8405	Under certain circumstances the stale data icon indicated that there was stale data in the brief when there was none that required updating
IN6481, nService 9284	A fix has now been implemented to prevent the Application security controls from overriding the individual user settings. This corrects an issue where a contributor could potentially edit translations in a locale that they didn't have access to
IN6521, nService 9574	When running in applet mode and in the approval section of AMS, Daeja only opened at half-height of the screen. This issue has been rectified
IN5420, nService 7164	Composite artworks copied from an existing Brief into a new Brief under certain circumstances could result in some of the project level data not being copied correctly

Appendix

Note: All changes from 5.3.9 will be included in the live release of 5.3.10 over the weekend of 14th/15th January 2017.

IN6615 contains further modifications and improvements to the new Factory Labelling module.
