

Product release information

Product	AMS
Release number	V5.3.13
Release date for evaluation	18th June, 2017
Release date for live deployment	09th July, 2017

Issue Date : 16th June, 2017
Re-Issue Date :
Author(s) : Quality Manager
Authorizer(s) : COO
Issuer : Quality Manager

DOCUMENT HISTORY

Date	Revision	Change
12th June, 2017	0.1	Internal review
16 th June, 2017	1.0	Customer release

Introduction

This document lists the enhancements and bugs relating to Kallik software products.

Disclaimer: Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

1. Enhancements

Reference #	Description
RQ:1451	Files that are related to a source of a Project used as a basis for a copy project should be included in the project brief and subsequent production tasks
RQ:2079	Enhanced security around the user session key used by AMS has been implemented.
RQ:1461	Improvements have been made to specific error messages which now include an Event Reference that can be supplied when submitting a support ticket.
IN:5839 nService # 7911	DAM - Retain filename for greater clarity when downloading files after previewing an asset
IN:6575	FL - Audit History - Field names appear multiple times in the history - Audit Table now clearly shows which fields are Order and Label
IN:6667	FL - Stepped printing can now accommodate 2 X 2 labels
IN:6739	FL - Full support for the Stepped printing functionality has been implemented.
IN:6773	FL - Now includes GTIN "check digit" barcode validation support
IN:6777	FL - Locking down COO "Product of" field and sending COP "Packaged in" country to Kallik as variable data
IN:6844	FL - GTIN Field Validation Settings for Production Print, Reprint and Relabel Modes
IN:6846 nService #9839	AMS - configuration allows "Print File" attributes to be populated from the parent artwork
IN:6766	FL - Different privileges for labelling operators and labelling supervisors has been introduced. These will be detailed in the AMS Administration Guide
IN:6789	FL - Change implemented to support box quantity
IN:6790	WM - The ViewOne/Daeja Annotations tool no longer supports the Java Applet mode and will display in HTML5 mode
IN:6752 nService #9861	RM - Update My Profile to remove PDF Viewer Type options
IN:6808	FL - Sending IPN and GTIN from SAP to AMS
IN:6809	FL - Changes applied during relabel process are applied to batch

2. Bug Fixes

Reference #	Description
IN:5685 nService #7610	DAM - re sizing window now works in chrome
IN:6423	FL - Rotation field dropdown selector has been updated to 0°, 90°, 180°, 270°
IN:6562	AG - Component Expiry date field can be cleared once set
IN:6589 nService #9509	ADM - The mechanism for the ADM File Exporter routine has been improved and will run in the background to avoid possible Apache timeouts when large batch exports are requested.
IN:6741 nService # 9779	AMS - Email Manager Worker modified to use multiple threads for better performance
IN:6782 nService #9935	BM - Expanded the list of characters that are not allowed when adding or renaming a SKU or component to include "+" character.
IN:6783 nService #9883	BI - "Project Translation Status Report" identifying missing content has been rectified
IN:6800	FL - If Manual Order mode is first in Run Type list then the issue with input fields not displaying correctly has been rectified
IN:6802	FL - Orders can now be edited once the order has been completed depending on the value of "printing-closed-orders-disabled".
IN:6804	FL - An issue with tooltips not displaying correctly for an Asset card has been resolved.
IN:6823	WM - An issue that prevented returning to the WM screen from the Print Samples screen when accessed via an approval route task has been corrected.
IN:6835 nService #101106	FL - Date picker Month and Year view modes issue resolved
IN:6838 nService #9941	AMS - The library used to generate the HTML Brief PDF has been upgraded to the 64bit version. This was preventing some thumbnails from appearing in document review based tasks.
IN:6847 nService #10133	SI - Disconnected virtual printer integration files now include the SKU value; filenames of the delivered files can be configured to include Runtime Variables and Base asset attributes (including the SKU).
IN:6863	FL - Clicking search with no ERP order number would cause session expiry error; The user will now be prompted to "Please enter an Order Number"
