3 rd November 2017	1.0	Customer Release

Introduction

This document lists the enhancements and bugs relating to Kallik software products.

Disclaimer: Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

Enhancements

General AMS

Reference #	Description
RQ:2080 IN:6952 IN:6959 IN:6960	<p>Further security enhancements have been applied to AMS as part of our continued improvement programme. From this release, AMS will only accept connections using TLS 1.1 and TLS 1.2, with other technologies including SSL 3.0 and TLS 1.0 no longer accepted.</p> <p>We recommend that the following tests be performed by key users and clients to ensure that any incompatibilities or issues can be addressed before the live release:</p> <ol style="list-style-type: none"> 1. Login/Logout via all supported browsers (IE11, Firefox ESR52, Chrome). 2. File Upload via Asset Manager and Workflow Manager 3. File Download via Asset Manager 4. Web service integration (project imports, phrase imports, work order imports) 5. Local Tools – AMS Cascade, ScanTVS, ViewOne/Daeja <p>Supporting material available.</p>
IN:5274 nService #6630	ADM - Field mappings in the ADM can now be concatenated into a single field. Note that this is configurable per client. Supporting Material available.
IN:6986 nService #10710	BI – The “AM Artwork Status – Current” report has been updated. Note: Client specific change.
IN:6958 nService #10558	BM - Translation inheritance where Master/Regional artworks are used can now be enabled/disabled. Note that this is configurable per client. Supporting materials available.
IN:6882	DAM – Improved logging has been implemented to assist with Support issues.
IN:6971	FL - A change has been made to the data displayed on the asset card. This is client specific.
IN:6973	FL – A change has been made to a Print Flow . This is client specific.
IN: 6929	FL - Improvements have been made to the response time when searching for work orders to print.
IN:6907	RM - The Audit Log no longer performs a search when it is first loaded to allow the user to control the search criteria and speed up the initial page load process. Supporting materials available.

IN:6836 nService #10067	SI - Improvements in the monitoring of the Service Integrator module including FTP transmissions and Web Service integration have been made.
IN:5826 nService #7801	WM – It is now possible to bulk Complete Tasks for Account Manager and Project Manager in the following workflows: C2 Standalone ; C5 Configurable ; C4 Standalone ; C4 Configurable. Supporting materials available.

Bug Fixes

Reference #	Description
IN:6963 nService #9976	AMS – The GV Inspection Report header has been updated on a specific Client's report.
IN:6964 nService #10532	AL – In the Asset Lifecycle module comments can no longer be added once the workflow is complete. Supporting material available.
IN:6965 nService #10548	BM – An issue that was preventing the What's Changed Report from loading correctly due to a client specific Form Definition has been resolved.
IN:1816 nService #9835	BM – It is no longer possible to progress through the Project Wizard unless at least one Region has been selected. Supporting material available.
IN:6925 nService #10424	DAM - It is no longer possible to select OK if no valid region has been selected in the attributes section. Supporting material available.
IN:6222 nService #8764	DAM - If an attribute is set to not searchable then it will not be returned in an Advanced search. Supporting material available.
IN:6853	FL - An issue on the Label Review screen whereby the scrollbar was not present on some browsers has been corrected. Supporting material available.
IN:6979 nService #10681	FL – A defect has been corrected that could allow the print status to be incorrectly updated when specific actions were taken.
IN:6798 nService #10652	FL – A defect was identified whereby a process may not be completed if a tag was missing in the label template. To correct this we have added the ability to configure new tags dynamically that are not present on the label template.
IN:6886	FL - A new version of the Factory Print Automation Service is available which includes performance improvements for large print jobs. Please contact your Account Manager or Kallik Support for more details.
IN:6916 nService #10399	FL – Improvements have been made within the Print Submission Status Check routine to ensure the correct values are being set.
IN:6824 nService #10011	RM – It is no longer possible to delete an Access Group if it is still in use. Supporting material available.
IN:6932 nService #10451	WM – Print files with a comma in the filename no longer cause an error in Chrome browser. Supporting material available.
IN:6957 nService #10556	WM - An issue when re-assigning a task that resulted in an error message being displayed has been corrected. Supporting material available.
IN:6978 nService #10658	WM – An error produced when loading old style AL/AAM workflows has been resolved.
IN:6922 nService #10279	AM/WF – Within the configurable Field Mappings structure, translatable field values will use the Master data values. Supporting material available.
