

Product release information

Product	AMS
Release number	v5.4.3 Engineering Patch 2
Release date for evaluation	11th January 2019
Release date for live deployment	27th January 2019

Issue Date : 11th January 2019
Re-Issue Date :
Author(s) : Jarnail Singh, Luke Poulton
Authorizer(s) : Ashley Goldie
Issuer : Kallik Support

DOCUMENT HISTORY

Date	Revision	Change
3rd January 2019	0.1	First Draft
11th January 2019	1.0	Customer Release

Introduction

This document lists the enhancements and bugs relating to Kallik software products.

Disclaimer: Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

Enhancements

Reference #	nService Ref. #	Description:
RQ:2743	n/a	FL - An improvement to the Automatic Artwork Generator has been made to improve the time from Generation to Print in the Factory Labelling module.

Bug Fixes

Reference #	nService Ref. #	Description:
IN:7638	12517	CSM - A change to the Claims Substantiation Manager which enables Dosages Profile to be saved with an empty Quantity.
IN:7889	12636	CSM - An improvement has been made to the Claims Substantiation Manager to increase performance by improving the modules session management.
IN:7780	n/a	FL - An improvement made to the Factory Labelling Print Manager which allows for barcodes to be generated left, centre, or right aligned in their template container. Clients who wish to use this functionality will require an updated Template Editor and should contact their Customer Success Manager or the Kallik Support team for more details.
IN:7781	n/a	AAG - An improvement made to the Automated Artwork Generator which allows for barcodes to be generated left, centre, or right aligned in their template container. Only clients who are using this feature will have their AAGs upgraded as part of this release.
IN:7722	12942	FL - Improved print head Barcode support to comply with GS1 height standards.
IN:7885	11585	SI - A change has been made to prevent file names being sent via the Service Integrator to have their filenames truncated when a '.' is used. This is a client specific change.
IN:7821	13004	BM - Improvements to "contents list" processing so only specific configured regions (USA (English)) are processed for patent superscripts. This is a client specific change.
IN:7933	n/a	PBP - A bug in the Project Batch Processor which caused an error to occur when processing field names has been fixed.
IN:7913	n/a	CSM - A improvement has been made to the Claims Substantiation Manager to show feedback when creating and loading the Ingredients Profile Document.
IN:7909	n/a	CSM - A bug which left the Save dosage button in the Claims Substantiation Manager active if the user removed any/all fields has been corrected.

Kallik product release information

IN:7883	13329	FL - Additional logging has been introduced in the Factory Labelling module to help detect an issue whereby work order values were being updated.
n/a	13051	BM - The profile used that controls the settings for the report created by the Comparison Tool has been updated to show more accurate information
