18th April 2019	1.2	The following enhancements and critical bug fixes have been added to the 6.1.2 release and are now available for testing on MyAMSPRO. Enhancements: IN9280 ; IN7887 ; RQ3870 ; RQ3873 Bug Fixes: IN9304 ; IN9248 ; IN9247 ; IN9366
26th April 2019	2.0	Final Customer Release

Introduction

This document lists the enhancements delivered by the 6.1.2 release for each of Kallik's Labelling and Artwork Management software products. The new release includes a significant update to the Phrase Manager, enhancements to the core AMS product, and changes to the underlying technology for a re-designed Brief Manager. The new Phrase Manager and core product enhancements will be available at the time the software is released to the hosted test environment. Clients are being invited to evaluate the new Brief Manager as part of a separate project which will take place on the Kallik Alpha environment.

Disclaimer: Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

New Phrase Manager

As described in the introduction above, the 6.1.2 release includes a significant change to the Phrase Manager which delivers the following enhancements. This update will be available to all clients upon deployment of the release to the hosted environment. An updated User Guide has been uploaded to MyAMSPPro.

In order for users to administer Phrase Types and Subtypes, the following Task Group must be added to the users' profile: PM-PhraseAdminType

Enhancements
