

Product Release Information

Product	AMS
Release number	6.2
Release date for evaluation	14th July 2019
Release date for live deployment	18th August 2019

Issue Date : 4th July 2019
Re-Issue Date : 13th August 2019
Author(s) : Rob Woodall, Luke Poulton, Dan Muir, Greg Thomas
Authorizer(s) : Luke Poulton
Issuer : Keith Burnham

DOCUMENT HISTORY

Date	Revision	Change
17th May 2019	0.1	First Draft
28th May 2019	0.2	Second Draft
4th July 2019	1.0	Client Release
1st August 2019	2.0	A number of additional bugs have been fixed since the Revision 1 notes were published. See Page 12 for details. IN9557 has been removed from the release.
13th August 2019	3.0	A number of additional bugs have been fixed since the Revision 2 notes were published. See Page 13 for details.

Introduction

This document lists the enhancements and bugs relating to Kallik software products.

Disclaimer: Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

Enhancements

Supporting Material available.

RQ / IN	nService	Description
---------	----------	-------------

General AMS

IN9498	14496	AMS - An enhancement has been made to allow a different logout URL to be applied for clients using SSO. authentication. Please contact Customer Success or Kallik Support for more details	
--------	-------	--	--

ADM

IN9314	11703	ADM - It is now possible, using configuration, to remove specified characters from component names when using the ADM Export function.	
--------	-------	--	--

Asset Manager

RQ2748	12028	AM - An enhancement to the Asset Manager which improves the Approval History Table to show the Approval Time and Date as well as the Upload Time and Date.	
RQ3856		AM/TE - New functionality whereby Templates opened in the Template Editor will become locked Assets added to the Asset Manager/Template Editor.	

BI

RQ3822	11247	BI - A BI report (Asset Attributes Report) that enables a user to download asset metadata (all types) driven by type, sub-type and attribute selection	
RQ2685	12007, 13585, 14133	BI - A report (Enhanced GTIN Report) that details all factory variable and barcode information associated to a component at the time of print.	
RQ3828	13410, 12924	BI - New client specific report (Project Progress Report) which enables a user to see which details key information associated with a component, including: the current status, the dates of actions and the duration of specific tasks has been added to the BI.	
IN9063	12686	BI - A client specific enhancement to BI Report (Factory Print Detail Report) which shows specific Factory Labelling statistics has been made.	
IN7788	10165	BI - A client specific enhancement to the BI which added the 'Route Last Used' date to a report (Reports Template) has been made.	

IN9273	12686	BI - A client specific enhancement to the BI which provided the addition of search filters to a specific report (Factory Print Detail) has been made.	
IN9450	11755	BI - A client specific enhancement to the BI which shows fields changed after the first time a Project Brief has been fully signed off has been made.	
IN9040	13631	BI - A new client specific report detailing Print Proof Approval timings has been created.	

Brief Manager

RQ3869	14014	BM - An enhancement to the Project Brief which allows Missing Translations to be exported in an Excel file has been made.	
RQ3794	12031	BM - An enhancement to the Project Brief which consolidates multiple translations associated to a single change to a field in the What's Changed Report has been made.	
RQ3886	11907	BM - An enhancement to the Project Brief which enables the system to reverse data applied by the Rules Engine if Rule Trigger fields are no longer fulfilling the Rule criteria.	
RQ3782	13261	BM - An enhancement to the Project Brief which enables users with the appropriate system access to change the Project Name and Description has been made.	
RQ3774		BM - An enhancement to the Project Brief which highlights fields populated by a Rule has been made.	
RQ2657	13647	BM - Existing functionality whereby the Project Brief is placed in Read-only mode if it is accessed via the Manage Project Processes screen has been added to the new Brief Manager.	
RQ2650	14570	BM - Functionality whereby fields which a user does not have access to are not visible has been added to the new Brief Manager	
RQ3780	13258	BM - New functionality added to the Project Brief which provides users the option to remove all associated Regional/Locale phrases from a field when removing the Master phrase.	
RQ3772		BM - New functionality in the Brief Readiness Check which enables a user to see which fields have been changed since the Sign-Off action was performed added to the Project Brief.	
RQ3846	13265	BM - New functionality whereby the Brief Readiness Check will be highlighted if there are any fields requiring attention has been added to the Project Brief.	
RQ3827	7161, 8961	BM - New functionality which enables a user to copy Components from one active Project to another has been added to the Project Brief.	
RQ3778		BM - New functionality which enables a user to copy field values to multiple items in the Project Items Table has been added to the Project Brief.	
RQ3852		BM - New functionality which enables a user to create new Phrase translations from the Phrase Selector has been added to the Project Brief.	
RQ2717	12836	BM - New functionality which enables a user to search for a Phrase based on a locale (translation), then select the associated Master Phrase and add this to the field has been added to the Project Brief.	

RQ3762		BM - New functionality which enables a user to see a warning for phrase translations which may have become out of date following a change to their Master Phrase has been added to the Project Brief.	
RQ2746	12767	BM - New functionality which enables a user to see fields populated by the AMS Rules Engine, but not make changes to them has been added to the Project Brief.	
RQ3776	13193	BM - New functionality which enables a user to see if Stale Data items have been archived has been added to the Project Brief.	
RQ3841		BM - New functionality which enables a user to see only changes made by the AMS Rules Engine in the What's Changed report has been added to the Project Brief.	
RQ3918	14540	BM - New functionality which enables a user to select a job to populate a field has been added to the Project Brief.	
RQ3843		BM - New functionality which enables a user to show and hide User, and AMS Rule Engine changes in the What's Changed report has been added to the Project Brief.	
IN9416	14367	BM - An enhancement to the Project Brief which displays a UI notification to the user when project notes have been added to the project has been made.	
IN9471	14607	BM - An enhancement to the Project Setup which prevents project names being saved with trailing spaces has been made.	
IN9729	15145	BM - An additional check has been added to the PBP import validation to ensure that the import file does not exceed 5MB, which would indicate a malformed sheet.	
RQ2650		BM - Functionality whereby fields which a user does not have access to are not visible has been added to the new Brief Manager	

Factory Labelling

RQ3873		FL - A client specific enhancement to Factory Labelling which enables the Order Quantity for specific Packaging Levels to be calculated using data received from a third party data source has been made.	
RQ3870	14050	FL - A client specific enhancement to Factory Labelling which enables the system to control which barcodes are displayed on the Scan and Validate screen based on the Run Type selected has been made.	
IN9280	13940	FL - An enhancement to Factory Labelling which enables the system to calculate rounded Expiry, or Manufacturing Dates whilst excluding Leap Year days has been made.	
IN7716	12713, 12605, 12640	FL - An enhancement to Factory Labelling which prevents the user from closing a print order before a label has been printed has been made.	

Phrase Manager

RQ3931	14516	PM - An enhancement to the Phrase Manager which allows a user to access a translation's history through the Manage Translations screen has been	
--------	-------	---	---

Kallik product release information

		made.	
RQ3760		PM - An enhancement to the Phrase Manager which now displays a warning when the content of a translation phrase may have become outdated following a change to the Master Phrase content has been made.	
IN9475	14581	PM - An enhancement to the Phrase Manager which displays the Master Phrase when adding or editing a Locale has been made.	
IN9474	14582	PM - An enhancement to the Phrase Manager which ensures text added to Phrase Name or Phrase Description wraps around the input field onto the next line has been made.	
IN9398	15048	PM - An enhancement to the Phrase Manager which enables the user to Show/Hide All Translations when managing Translations has been made.	

Resource Manager

IN9451	N/A	RM - An enhancement to the Resource Manager which adds the Resource Manager as a selectable option in the Audit Log Application dropdown has been made.	
IN8938	13393	RM - An enhancement to the Resource Manager which improves the error handling when completing the Form Definition validation has been made.	

Rules Engine

RQ3885	13020	RE - New functionality which enables a user to manually compile rules so that a cached rule set is ready to be used when a Project is started has been added to the Rules Engine.	
--------	-------	---	---

Template Editor

The new Template editor will be issued separately to the general AMS 6.2 Release.

RQ3867		TE - Added ability to access an AMS user account via the Template Editor.	
RQ3771		TE - Added functionality to load client Font Style Maps from AMS directly to the Template Editor	
RQ3866		TE - Added functionality to load client Tag Definitions from AMS directly to the Template Editor	
RQ3788	13253	TE - An enhancement to the Template Editor which improves the visibility of tags and fonts available for selection has been made.	
RQ3768		TE - Functionality allowing users to load Background Traces directly from the Asset Manager to the Template Editor.	
RQ3769		TE - The functionality to generate and preview a template using live label data in the Template Editor.	
RQ3767		TE - The functionality to load and save Templates directly to the Asset Manager from the Template Editor.	

Bug Fixes

Supporting Material available.

IN	nService	Description
----	----------	-------------

General AMS

IN9248	14066	AMS - A bug in AMS which caused the asset search to slow down has been fixed.	
IN9367	14116	AMS - A bug in AMS which caused the prevention of data being sent via SFTP to a specific client has been fixed.	
IN9366	14471	AMS - A bug whereby SSO users that had been created using a web service were being requested to change their password on first use of the system has been fixed.	
IN7737	12926, 12821, 14371	AMS - A bug whereby users logging in via Single Single-on protocols which caused timestamps not to be logged in the users local time has been fixed.	

AAG

IN9119, IN9655	13698, 15044	AAG - A bug in the AAG which caused an error to occur when calculating the height of Code 39 barcodes has been fixed.	
-------------------	-----------------	---	--

ADM

IN9575	14749	ADM - A bug in the ADM which caused the Component Stamper to not update approved artwork PDFs has been fixed.	
IN7254	12332	ADM - A bug which caused a user interface display issue in the ADM was fixed	

Asset Manager

IN9323	14301	AM - A bug in the Asset Manager which caused the Reason for Change field to incorrectly be applied to all assets in the Upload Queue has been fixed.	
--------	-------	--	--

Brief Explorer

IN9573	14747	BE - A bug in the Brief Explorer which caused a -1 value to appear in the What's Changed report has been fixed.	
IN9472	15138	BE - A bug in the Brief Explorer which caused Projects to become editable when accessed from the Brief Explorer which should have otherwise been read-only has been fixed.	

BI

IN9545	14115	BI - A bug in the BI which caused the 'Artworks Created Count Report' to display an incorrect number of artworks has been fixed.	
IN9397	10165	BI - A bug in the BI which caused the BI report 'Report Templates' to show every instance a route was used has been fixed.	
IN9676	14923	BI - A bug in the Active Projects Report which caused it to perform poorly has been fixed.	
IN9041	13630	BI - A client specific enhancement to the BI which add additional columns to the Approved Artworks Report has been made.	

Brief Manager

IN7676	12357	BM - A bug in the Project Setup whereby fields using a semicolon ';' as a delimiter were failing to be added to the Component metadata has been fixed.	
IN9228	14454	BM - A bug in the Project Setup which caused an error when a user exited a blank project has been fixed.	
IN9268	14160	BM - A bug in the Project Setup which caused Contributors to not display in alphabetical order has been fixed.	
IN7826	13199	BM - A bug in the Project Setup which caused form definition differences to not be highlighted to the user has been fixed.	
IN9344	14428	BM - A bug in the Project Setup which caused regions to be added automatically into a copied project, despite them not being present in the source project has been fixed.	
IN9480	14622	BM - A bug in the Project Brief which caused an error to occur clearing multiple fields in a single action has been fixed.	
IN7005	10836	BM - A bug in the Project Brief which caused an error to occur when a SKU contained a space at the end of its name has been fixed.	
IN9265	14147	BM - A bug in the Project Brief which caused child data to remain after parent data is removed has been fixed.	
IN9034	12877	BM - A bug in the Project Brief which caused content flag placing to be case sensitive has been fixed.	
IN9408	14595	BM - A bug in the Project Brief which caused the master phrase not to copy from other components has been fixed.	
IN6892	10249	BM - A bug in the Project Brief which caused phrases belong to a Subtype which the current user does not have access to, to return as search results in the Phrase Selector has been fixed.	
IN9016	13690	BM - A bug in the Project Brief which caused the Project Views (SKU View, Component View) to load slowly when the Brief contains a large number of Components has been fixed.	
IN9360	14431	BM - A bug in the Project Brief which caused the Run Report button on the What's Changed report to be disabled has been fixed.	

Kallik product release information

IN9354	14427	BM - A bug in the Project Brief which caused the search field in the What's Changed to return incorrect results has been fixed.	
IN7655	12758	BM - A bug in the Project Brief which caused variable tags within translations to fail to populate has been fixed.	
IN9568	14837	BM - A bug in the Project Setup which caused the ordering on Regions/Countries to ignore the order defined in the Resource Manager has been fixed.	
IN9683	15071	BM - A bug in the Project Brief which prevented a Project being signed-off when the Project contains a copied Component has been fixed.	
IN9704	15100	BM - A bug in the Project Brief which cause an error to occur when changing a Component code has been fixed.	
IN9708	15171	BM - A bug in the Project Brief which caused an error to occur when importing Active Labels in the Project has been fixed.	
IN9740	15191	BM - A bug in the Project Brief which caused an error to occur when attempting to preview a ECC200 barcode has been fixed.	
IN9743	15202	BM - A bug in the Project Brief which prevented the Populate All/Populate Blank actions not correctly populating All/Blank translations has been fixed.	
IN9745	15171	BM - A bug in the Project Brief which caused an error when attempting to import Approved Components in the Project has been fixed.	
IN9506	14601	BM - A bug in the Project Brief which caused Components imported via the Import Approved Components functionality to lose data during the import process has been fixed.	
IN9478	15357	BM - An enhancement to the Project Brief which enables users to access the Remove functionality without having to select rows in the Project Items Table has been made.	
IN9527	14762	BM - A bug in the Project Brief which caused attachments to not be shown in Artwork Review has been fixed.	
IN9661	15043	BM - A bug in the Project Brief which caused a Phrases of a certain length or greater to display incorrectly when added to a field has been fixed.	
IN9493	14270	BM - A bug in the Project Brief which caused the SKU description in the SKU, and Component Views to be replaced with the SKU Code has been fixed.	
IN9546	14550	BM - A bug in the Brief Manager which caused a non-functioning Reporting button to display has been fixed.	

Factory Labelling

IN9466	14661	FL - A bug in Factory Labelling which caused barcodes to fail validation in the print flow has been fixed.	
IN9477	14644	FL - A bug in Factory Labelling which caused Code 39 barcodes to support uppercase characters only has been fixed.	
IN9295	14173	FL - A bug in Factory Labelling which caused orders to be duplicated when received from a third party data source has been fixed.	

Kallik product release information

IN9293	14297	FL - A bug in Factory Labelling which caused print jobs to permanently remain at the submitted stage has been fixed.	
IN9483	14656	FL - A bug in Factory Labelling which caused preview version of a label, as opposed to the print version of a label to be uploaded to the Asset Manager has been fixed.	
IN7804	12378	FL - An investigation in the Factory Labelling module which added extra logging to help determine the root cause of a Printing Sequence issue has been undertaken.	
IN9659	14971	FL - A bug in Factory Labelling which caused cached data to appear on the label in very specific circumstances has been fixed.	
IN9232	13926, 14745, 14980	FL - A bug in Factory Labelling Label Search Results screen which could cause multiple searches to take place and return duplicate results when the Search button was double clicked has been fixed.	

Phrase Manager

IN9371	12770	PM - A bug in the Phrase Manager which prevented the Phrase Description field from auto-expanding to show more than 30 characters has been fixed.	
IN9482	14567	PM - A bug in the Phrase Manager which caused a line break to be added when a user copied text from MS Excel has been fixed.	
IN9532	14732	PM - A bug in the Phrase Manager which caused a line break to be added when a user copied text from MS word has been fixed.	
IN9486	14556	PM - A bug in the Phrase Manager which caused empty Locales to indicate translations are present has been fixed.	
IN9473	14563	PM - A bug in the Phrase Manager which caused phrase searches to be carried out on both Phrase Names and Phrase Descriptions has been fixed.	
IN9410	14575	PM - A client specific bug in the Phrase Manager which caused users to be unable to manage translations by cluster has been fixed.	
IN9501	14751	PM - A bug in the Phrase Manager which caused words to be cut off in phrase preview has been fixed.	
IN9613	14923	PM - A bug in the Phrase Manager which caused the Active Project Report to fail and return the user to the Administer Phrase Manager tab has been fixed.	

Resource Manager

IN7617	12676 15278	RM - A bug in the Resource Manager which caused the system to perform slowly when loading the Users section has been fixed.	
--------	----------------	---	---

Workflow Manager

IN9401	14218	WM - A bug in the Workflow Manager which caused a user to see a previous batch review screen when re-entering batch review has been fixed.	
IN5793	7692	WM - A bug in the Workflow Manager which caused an error to occur when a user added a Reason for Change above 500 characters has been fixed.	

Kallik product release information

IN7929	13361, 14007	WM - An issue in the Workflow Manager that could allow duplicate tasks to be created has been resolved.	
IN9389	12205	WM - A bug in the Workflow Manager which caused a user interface error on the Reject button tooltip to occur has been fixed.	

General

A number of other undocumented bugs have also been addressed as part of this release.

Additional Items Added Since Release V1.0

Asset Manager

IN9785	15316	AM - A bug in the Asset Manager which was preventing the 'Compare Versions' button from correctly displaying has been fixed.	
--------	-------	--	---

ADM

IN9793	15342	ADM - A bug in the ADM which caused an error to occur when making changes to untranslated fields has been fixed.	
IN9736	15158	ADM - A bug in the ADM which caused Regional Fields from working in-conjunction with "all but lead" in the template (for certain scenarios) has been fixed.	

Brief Manager/ADM

IN9752	14679, 15422	BM/ADM - A bug in the Brief Manager which prevented Region and Locale Relationships from persisting to the ADM has been fixed,	
IN9829	15400	BM - A bug in the Project Importer which caused Project containing imported Barcode Data to fail to generate correctly in the ADM has been fixed.	
IN9818	15423	BM - A bug in the Project Brief which caused an error to occur with Field State Attributes when executing Reverse Rules has been fixed.	
IN7714	12901	BM - A bug in the Project Brief which prevented data from populating correctly from the Project Setup (a data levelling issue) has been fixed.	
IN9688	14679	BM/ADM - A bug in the Project Brief which caused an error to occur with translations when a new Artwork version is created has been fixed.	
IN9763	15246	BM - A bug in the Project Brief which caused the user interface to attempt to update fields the Project Items Table for a completed Project has been fixed.	
IN9765	15229	BM - A bug in the Project Brief user interface which prevent users from scrolling to view all Project Components has been fixed.	
IN9796	15357	BM - A bug in the Project Brief which caused the starting point of labels to be inaccurate and prevent Project Sign-off has been fixed.	

Factory Labelling

IN9693	14754, 15099	FL - A bug in Factory Labelling which caused the system to perform slowly when loading the Label Review screen has been fixed.	
N/A	15057/ 15094	FL - Additional logging has been added to AMS Factory Labelling to assist ongoing investigation.	
IN9767	15146	FL - A bug in Factory Labelling which caused an error to occur when the user double-clicked the Home button has been fixed.	

Phrase Manager

IN9802	15386	PM - A bug in the Phrase Manager which added hidden <p> tags to Phrases which in turn prevented Artwork from generating in the ADM has been fixed.	
--------	-------	--	---

Project Batch Processor

IN9698	15078, 15085	PBP - A bug in the Project Batch Processor which caused the system to perform poorly has been fixed.	
--------	--------------	--	---

Additional Items Added Since Release V2.0

Brief Manager

These bug fixes are applicable to BM3 only.

IN7876	13223	BM - A bug in the Project Brief which caused fields to lose translations when the AMS Rules Engine is executed has been fixed.	
IN9748	15202	BM - An enhancement to the Project Brief which allows users to populate all Translations regardless of Translation access has been made.	
IN9894	15658	BM - A bug in the Project Brief which caused populated mandatory fields to be flagged as empty in the Brief Readiness Report has been fixed.	
IN9931	15761, 15762	BM - A bug in the Project Brief which prevented Blank Translations not populating if data levelling was not selected has been fixed.	
IN9936	15775	BM - A bug in the Project Brief which prevented the Run Rules trigger button from populating Translations has been fixed.	
IN9946	15813	BM - A customer specific bug in the Project Brief which caused changes to the Clusters in Project Items Table to fail to update on Components has been fixed.	
IN9947	15771	BM - An enhancement to the Project Brief enables the Approved/Active Component import functionality to be role controlled has been made.	

Phrase Manager

IN9875		BM - A bug in the Phrase Manager which caused an error to occur when pasting HTML lists into the Text Editor via 'Paste From' has been fixed.	
IN9886	15581	PM - A bug in the Phrase Manager which caused line breaks to be ignored when copying Phrases has been fixed.	
IN9925		PM - A bug in the Phrase Manager which caused an additional or space to be added before and after copied text has been fixed.	

General

A number of other undocumented bugs have also been addressed as part of this Patch.

Appendix
