

Kallik AMS

Product Release Information

6.3

Product Release Information

Product	AMS
Release number	6.3
Release date for evaluation	6th October 2019
Release date for live deployment	27th October 2019

Issue Date : **25th October 2019**
Author(s) : **Rob Woodall, Luke Poulton, Dan Muir, Greg Thomas**
Authorizer(s) : **Luke Poulton**
Issuer : **Keith Burnham**

DOCUMENT HISTORY

Date	Revision	Change
3rd October 2019	0.1	First Draft
4th October 2019	1.0	Client Release
10th October 2019	1.1	Added IN10162. Clarified support material inclusion.
21st October 2019	2.0	Updated RQ3876 with additional nService Reference. Added IN10170 ; IN10040
23rd October 2019	2.1	Confirmation that IN9794 has no supporting material
25th October 2019	3,0	Final Client Release

Removal of Supporting Material

The publication of Supporting Material for the following Incidents was incorrect in the 1.0 revision. Supporting material for the following items will not be supplied..

IN9286	14282	BM - A bug in the Project Brief which caused disabled locales to appear in the Brief Readiness Report has been fixed.	
IN9749	15200	BM - A bug in the Project Brief which caused the number of Regions in a Project to incorrectly display as 0 has been fixed.	
IN9920	15550	WM - A bug in the Workflow Manager which caused Artwork Previews to render incorrectly in Batch Approval has been fixed.	
IN9924	15043	BM - A bug in the Project Brief which caused phrases to be cut off within drop down menus has been fixed.	
IN9794	15341	BM - A bug in the Project. Brief which caused the 'Go to Field' in the Brief Readiness Check to open the incorrect Field Level has been fixed.	

Introduction

This document lists the enhancements and bugs relating to Kallik software products.

Disclaimer: Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

Enhancements

Supporting Material available.

RQ / IN	nService	Description
---------	----------	-------------

General AMS

RQ3876	13399 16040	AMS - A client specific enhancement to AMS which allows the export of data via FTP to comply with MDR has been made.	
--------	----------------	--	--

BE

RQ3779	13255, 15050	BE - An enhancement to the Brief Explorer which allows editing of fields a user has access to has been made.	
--------	-----------------	--	--

BI

IN9726	15013	BI - An enhancement to the BI which added the locale field to the Components Changed After Sign Off report has been made.	
--------	-------	---	--

Brief Manager

IN10019		BM - An enhancement to the Project Brief which adds tool tips to drop-down list in the PIT has been made.	
IN9999	15288	BM - An enhancement to the Project Brief which aligns headers in the What's Changed has been made.	
RQ2633		BM - An enhancement to the Project Brief which allows a user to add dynamic fields to a component has been made.	
RQ2634		BM - An enhancement to the Project Brief which allows a user to edit and delete dynamic fields has been made.	
IN9563	14680	BM - An enhancement to the Project Brief which allows a user to edit the collation route without having to sign off the Project Brief has been made.	
IN9944	14270	BM - An enhancement to the Project Brief which allows parenthesis on descriptions to be configured has been made.	
IN9368	14364	BM - An enhancement to the Project Brief which allows the selection of 'ADM User' as an email recipient when creating a Project Note and executing emails from the Brief has been made.	
RQ3853	14914	BM - An enhancement to the Project Brief which enables users to Quick Upload files, via drag and drop, to the Documents page has been made.	

IN9798		BM - An enhancement to the Project Brief which has reduced the time taken to load the Brief Readiness Check has been made.	
IN10064		BM - An enhancement to the Project Brief which identifies the file name in upload error messages has been made.	
IN9781		BM - An enhancement to the Project Brief which increased the visual differences between Enable/Disable toggles has been made.	
IN9811	15391	BM - An enhancement to the Project Brief which keeps phrase selectors open after a user has selected 'ADD MASTER' has been made.	
IN9614		BM - An enhancement to the Project Brief which notifies a user when a field has been locked by a rule has been made.	
IN9038	13260	BM - An enhancement to the Project Setup to show an indicator which enables users to quickly identify which Distributions have no Contributors selected has been made.	
RQ3978		BM - An enhancement to the Project Setup which allows multiple regional variations to be added to a master artwork has been made.	
IN9706	15311	BM - An enhancement to the Project Setup which displays a Regions column in the Source Asset table has been made.	
IN8943	13333	BM - An improvement to the error message displayed to the user when performing a Subtype lookup as part of the import process has been made.	
RQ3840	13062, 14649, 15353	BM - New functionality which enables a user to see changes made to the Project structure in the Project Setup to display in the What's Changed report has been added to the Project Brief.	

Factory Labelling

RQ3966	13899	FL - A client specific enhancement to AMS which presents 2 new API's for printing has been made.	
IN9938	15792, 16051,	FL - Additional information is now being stored in the database relating to PCV Barcode validation steps to assist troubleshooting. In addition, improvements have been made to the sequencing within the validation and print request process to ensure that all requests are processed in the correct order	
IN10021	15947	FL - Additional logging has been implemented to help improve support investigation.	
RQ2629	11761	FL - New functionality which enables a user to receive site specific email notifications when artworks have been approved has been added to Factory Labelling.	
RQ3980		FL - A client specific enhancement to Factory Labelling which allows a user to print ISBT compliant 128 barcodes has been made.	

Project Batch Processor

RQ2640	8683, 12873	PBP - An enhancement to the Project Batch Processor which hides initial artworks in the Asset Manager until an Artwork is approved has been made.	
--------	-------------	---	---

Bug Fixes

Supporting Material available.

IN	nService	Description
----	----------	-------------

General AMS

IN9771	15249	AMS - A bug in the AMS which prevented failed login attempts to be correctly captured in the audit log has been fixed.	
--------	-------	--	--

ADM

IN9632	14868	ADM - A bug in the ADM which caused an incorrect file to be selected when routing for Approval when the Project contained an attachment with the same name as a Component Code has been fixed.	
--------	-------	--	--

Asset Manager

IN8941	13282	AM - A bug in the Asset Manager which caused the External ID and External Context metadata fields to be replaced when an asset was upversioned has been fixed.	
--------	-------	--	--

BI

IN10003	15906, 15959	BI - A bug in the BI which caused the Components Changed After Sign Off report to continuously load has been fixed.	
IN10170	16262	BI - Updated Component Field Value report to correct data missing from the report.	

Brief Manager

IN9411	14558	BM - A bug in the Phrase Selector which prevented the system showing the full available text has been fixed.	
IN9885	15640	BM - A bug in the Project Brief which caused a user to be navigated back to Project Setup when using Go To Field has been fixed.	
IN10070	15901	BM - A bug in the Project Brief which caused asterisks to not convert into correct patent numbers within phrases has been fixed. This is client specific.	
IN9286	14282	BM - A bug in the Project Brief which caused disabled locales to appear in the Brief Readiness Report has been fixed.	
IN9555	14562	BM - A bug in the Project Brief which caused incorrect entries in the What's Changed due to minimum font size changes has been fixed.	

IN9924	15043	BM - A bug in the Project Brief which caused phrases to be cut off within drop down menus has been fixed.	
IN9457	15405	BM - A bug in the Project Brief which caused Rule Trigger Fields which were previously populated by Rules then updated by a user, to incorrectly be labeled as a field changed by Rules in the What's Changed report, has been fixed.	
IN9897	15370	BM - A bug in the Project Brief which caused run rules to not be shown when data is copied in the PIT has been fixed.	
IN9787	15315	BM - A bug in the Project Brief which caused text in the Project Summary page to remain on a single line and not wrap has been fixed.	
IN9937	15764	BM - A bug in the Project Brief which caused the field description to disappear when an asset/phrase is removed has been fixed.	
IN9749	15200	BM - A bug in the Project Brief which caused the number of Regions in a Project to incorrectly display as 0 has been fixed.	
IN9442	13785	BM - A bug in the Project Brief which incorrectly limited the maximum number of characters in Project Notes has been fixed.	
IN10005	14364	BM - A bug in the Project Brief which prevented the user from excluding ADM users from the Project Notes email list has been fixed.	
IN10066		BM - A bug in the Project Brief which prevented What's Changed records from being written when a user publishes in BM2 has been fixed.	
IN9768	15248	BM - A bug in the Project Setup which caused a list of users available for a stage to not default to the top of the list when a new stage is navigated to has been fixed.	
IN9631	15001	BM - A bug in the Project Setup which prevented the user from selecting data imported via an Agile system has been fixed.	
IN9794	15341	BM - A bug in the Project. Brief which caused the 'Go to Field' in the Brief Readiness Check to open the incorrect Field Level has been fixed.	
IN9932	15742	BM - A client specific enhancement to the Project Setup which has changed a warning message from using 'Zone' to a client specific term has been made.	
IN9989	15697	BM - A bug in the Project Brief which caused the user to be unable to view complete phrase names has been fixed.	
IN10146	16109	BM - A bug in the Project Brief which caused no specific region translations to be added twice has been fixed.	

Factory Labelling

IN9892	15398	FL - A bug in Factory Labelling which caused an error to occur to the Print Job Summary when the Order Quantity was not populated has been fixed.	
IN9873	15547	FL - A bug in Factory Labelling which caused incorrect serialized data to be included in sample prints has been fixed.	
IN9915	15686	FL - A bug in Factory Labelling which caused print jobs executing the Batch Print Run Type to slow down when validation a large number of labels has been fixed.	

IN10089	16053	FL - A bug in Factory Labelling which caused users to be unable to view label metadata has been fixed.	
IN9991	15616, 16149	FL - A bug in Factory Labelling which caused increased times to loads multiple screen within the module has been fixed.	
IN10040	15997	FL - A client specific issue whereby data was not always being loaded in the Label Review screen if data was still being imported has been corrected.	

Phrase Manager

IN9162	13943	PM - A bug in the Phrase manager which affected phrase previews has been fixed.	
IN9626	14859	PM - A bug in the Phrase Manager which caused incorrect displaying of German characters has been fixed.	
IN9957	15581	PM - A bug in the Phrase Manager which caused right to left text to be displayed in the wrong orientation has been fixed.	
IN9434	14256	PM - A bug in the Phrase Manager which prevented the user from collapsing the Types in the left hand tree has been fixed.	

Project Batch Processor

IN10034	15967	PBP - A bug in the Project Batch Processor which caused spaces in blank cells to slow down validation has been fixed.	
---------	-------	---	---

Rules Engine

IN9997	15729	RE - A bug in the Rules Engine which caused a conflict between translatable and untranslatable field population has been fixed.	
--------	-------	---	---

Service Integrator

IN6974	9172	SI - A bug in the Service Integrator which prevented the meta data being copied from parent Components to child Components has been fixed.	
IN9121	12776, 13301	SI - A client specific bug that allowed assets that hadn't been created/up-versioned via a project to be passed to the Service Integrator processing queue has been fixed.	
IN 10162	12528, 15584	Service Integrator - An enhancement to the Service Integrator which allows outgoing connections to be performed in TLS1.1 or higher has been made.	

Workflow Manager

IN9850	15335	WM - A bug in the Workflow Manager which caused an error to occur if a Print Proof type or subtype has a permission set against it has been fixed.	
IN9920	15550	WM - A bug in the Workflow Manager which caused Artwork Previews to render incorrectly in Batch Approval has been fixed.	

IN7796	13089	WM - A bug in the Workflow Manager which caused tasks associated to deleted Components to persist and not be deleted has been fixed.	
--------	-------	--	---

General

A number of other undocumented bugs have also been addressed as part of this release.

Appendix

This page left intentionally blank.
