

Product Release Notes

Veraciti 6.4

Product Release Information

Product	Veraciti
Release Number	6.4
Release Date for evaluation	26 th January 2020*
Release Date for live deployment	1 st March 2020

**To provide sufficient lead time to our engineering team to address UAT issues, we ask for feedback on the Veraciti 6.4 Release by no later than the 10th February.*

Issue Date: **7th February 2020**
Re-Issue Date: **28th February 2020**
Author(s): **Luke Poulton, Daniel Muir, Greg Thomas**
Authorizer(s): **Luke Poulton**
Issuer: **Keith Burnham**

Document History

Date	Revision	Change
2nd January 2020	0.1	First Draft
17 th January 2020	1.0	Client Release
22 nd January 2020	1.1	Removed duplicates: <ul style="list-style-type: none">• RQ:4058• RQ:4059 Added RQ:4013 (upgrade to Annotations Tool). Removed IN:10263, IN:10195. These were previously deployed to Production as part of Veraciti 6.3.1.
24 th January 2020	2.0	Client Release
5 th February 2020	2.1	Addition of: <ul style="list-style-type: none">• RQ:4144• IN:10458• IN:10479 Updated IN:9666 to additional nService Ref.
7 th February 2020	3.0	Client Release
28 th February 2020	3.1	Addition of: <ul style="list-style-type: none">• IN:10537
28 th February 2020	4.0	Final Release

Introduction

This document lists the enhancements and bugs relating to Kallik software products.

Disclaimer

Every care has been taken in the preparation of this document and other information that we publish to ensure that the information is accurate, factual and correct to the best of our knowledge, at the time of publishing. Kallik Limited accepts no liability for any loss or damage or unforeseen consequential loss or damage arising from the use of the information contained within these documents. The information published in these products is subject to change without notice at any time, and Kallik Limited accepts no liability or obligation to inform the reader of such changes.

Changes to the Veraciti login page

As part of Veraciti 6.4, we will be making some changes to the login page to incorporate our new branding. From the Veraciti login page, we will be removing the following items:

- Twitter Feed
- Hero link to Kallik blog
- Hero link to Kallik news
- Hero link to Support Center (the link at the top of the page will remain)
- Bottom banner with micro-links to corporate website and social media

The screenshot displays the Veraciti login interface. At the top left is the Kallik logo with the tagline 'TRUST IN YOUR LABEL • TRUST IN YOUR BRAND'. At the top right, it says 'TALK TO US TODAY +44 1827 318100 SUPPORT'. The main login area is titled 'Veraciti™ Login' and contains three input fields: 'Company:', 'Username:', and 'Password:'. A green 'Login' button is positioned to the right of the password field. Below the fields, there is a 'Forgotten Password?' link. A security notice states: 'You must never share or reveal your username or password. For security reasons, Veraciti™ constantly monitors users and any suspicious activity may cause your account to be suspended.' The version number 'Version 6.4.IN10276.61403' is visible in the bottom right corner of the login form.

To support these changes, we will also be posting a message on the Production login page prior to the change to inform users.

NOTE: Users of single-sign-on (SSO) will not see this message.

New Functionality

 Supporting Material available.

General Veraciti

RQ / IN	nService	Description	
RQ:2660		VER - Functionality which enables Single-Sign-On Task for Task Authentication has been added to Veraciti.	

Asset Manager

RQ / IN	nService	Description	
RQ:4029	14931	AM - New functionality which enables users to assign a Run Type to the asset Metadata for Factory Labelling Artwork which enables the automatic selection of Run Type when Printing has been added to the Asset Manager.	

Brief Manager

RQ / IN	nService	Description	
RQ:4058	14148	BM - A client specific enhancement to the Project Setup which allows an overview of the project contents has been made.	
RQ:4059	14148	BM - A client specific enhancement to the Project Setup which skips the Countries step if countries are already present in the project has been made.	
RQ:4066	15046	BM - An enhancement to the Project Brief Asset Selector which enables a user to access Asset Manager Folders and their assets has been made.	
RQ:3892		BM - An enhancement to the Project Brief which allows the right-hand side of a What's Changed entry to be filtered by locale has been made.	
RQ:4020	15699	BM - An enhancement to the Project Brief which allows the What's Changed to be filtered so that only changes made by a specific user are shown has been made.	
RQ:4036	15695	BM - An enhancement to the Project Brief which allows users to toggle the field view has been made.	
RQ:4037	15694	BM - An enhancement to the Project Brief which shows translations missing a minimum of 1 translation with an amber warning has been made.	
RQ:4075	14365, 15657	BM - An enhancement to the Project Setup which allows users to control task traffic lights more effectively has been made.	
RQ:3882		BM - Functionality that allows a user to filter results within a what's changed entry detail has been added to the Project Brief.	
RQ:4057	15853	BM - New functionality added which enables users to execute Rules as a background task has been added to the Project Brief.	
RQ:4103	15704	BM - New functionality which enables a user to view translations of a field in a document format has been added to the Project Brief.	

RQ:4028		BM - New functionality which enables users to assign a Run Type to components has been added to the Brief Manager.	
RQ:3891	12788	BM - An enhancement to the Project Brief which allows the What's Changed to be exported has been made.	

Factory Labelling

RQ / IN	nService	Description	
RQ:3791	16215	FL - An enhancement to Factory Labelling which saves, and automatically loads the last used print settings against a component has been made.	
RQ:4083	16054	FL - New functionality which enables users to reprint the last label when executing a Batch Print has been added to Factory Labelling.	
RQ:4046		FL - New functionality which notifies users if labels within the selected Order have been previously printed has been added to Factory Labelling.	
RQ:4084	16054	FL - New functionality which prints all validation labels in one operation when using Batch Print has been added to Factory Labelling.	
RQ:4144		FL - A configurable enhancement to Factory Labelling which automatically saves current Printer Settings and loads them for other users has been made.	

Phrase Manager

RQ / IN	nService	Description	
RQ:4072	16192	PM - An enhancement to the Phrase Manager which shows a translation being marked in sync in Translation Information has been made.	

Rules Engine

RQ / IN	nService	Description	
RQ:4095		RE - Numerous user interface and user experience changes have been made to the Rules Editor.	
RQ:4092		RE - An enhancement to the Rules Engine which forces users to input a reason for change when making a change to a Rule Set has been made.	

Resource Manager

RQ / IN	nService	Description	
RQ:3900		RM - An enhancement to the Resource Manager which allows users to access the history of a Rule has been made.	
RQ:3901		RM - An enhancement to the Resource Manager which allows users to access the history of a Rule Set has been made.	
RQ:4092		RM - An enhancement to the Resource Manager which forces users to input a reason for change when making a change to a Rule Set has been made.	
RQ:4093		RM - An enhancement to the Resource Manager which identifies	

		Rule change entries in the audit log has been made.	
RQ:4094		RM - An enhancement to the Resource Manager which identifies Rule Set change entries in the audit log has been made.	
RQ:4089		RM - An enhancement to the Resource Manager which includes the validation of a Rule Set within the compilation process has been made.	
RQ:3897		RM - An enhancement to the Resource Manager which notifies the users when an artefact in a Rule is invalid has been made.	
RQ:4091		RM - An enhancement to Veraciti which forces users to input a reason for change when making a change to a Rule has been made.	
RQ:4090		RM - New role controlled (RuleAdministrator) functionality which enables users to manually validate Rule Sets has been added to the Resource Manager.	
RQ:2678	12019	RM - When a new attribute is created in the Resource Manager, it will be defaulted to Shares - No	

Workflow Manager

RQ / IN	nService	Description	
RQ:4070		WM - A configurable enhancement to Factory Labelling which allows users to use Production Run Types from the Print Sample feature has been made. (Client specific configuration required - please speak with your Customer Success team).	
RQ:4013		WM - An enhancement to the Workflow Manager which allows the Annotations Tool to be used on a mobile and tabular device has been made.	

Enhancements and Bug Fixes

 Supporting Material available.

General Veraciti

RQ / IN	nService	Description	
IN:10180	16274	VER - A bug in Veraciti which caused blank annotations to appear in the Asset Approval History report has been fixed.	
IN:9285	13980, 14144, 14101	VER - A bug in Veraciti which caused reviewer comments to not be captured in the Annotations Tool has been fixed.	
IN:9804	15393	VER - A bug in Veraciti which caused Tasks to appear twice in a user's inbox when two users reassign to the same user, at the same time has been fixed.	

ADM

RQ / IN	nService	Description	
IN:7543	12916, 12980	ADM - A bug affecting IE users which caused an error to occur when attempting to review Artwork Data has been fixed.	
IN:10035	15501	ADM - A bug in the ADM which cause right-to-left text to display incorrectly has been fixed.	
IN:9995	15876	ADM - A bug in the ADM which caused the upload action to be triggered twice when the button was double clicked has been fixed.	
IN:10319	16423	ADM - A bug in the ADM which caused generation folders to be unaligned with the BOM has been fixed.	

Asset Manager

RQ / IN	nService	Description	
IN:10186	16247	AM - A bug in the Asset Manager which caused users to be unable to open and view assets when file names contain 'Ö' has been fixed.	

BI

RQ / IN	nService	Description	
IN:10263	15959 15906	BI - A bug in the BI which caused the Components Changed After Sign Off report to crash when a field contained 4000 bytes has been fixed.	
IN:9862	14242	BI - A client specific enhancement to the BI module to include region filters in multiple reports has been made.	
IN:10399		BI - A client specific bug in the Approved Artworks Report which caused an incorrect number of results to be displayed when interacting with MBUs has been fixed.	

IN:10400		BI - A client specific bug in the Component Status Report which caused unselected MBUs to be shown has been fixed.	
IN:10401		BI - A client specific bug in the Components Requiring Compliance Review Report which caused no data to display when searching for MBUs with certain data range parameters has been fixed.	
IN:9370	14395	BI - A bug in the Approved Artworks Without Effectivity Date Report which caused archived artwork to appear as results has been fixed.	

Brief Manager

RQ / IN	nService	Description	
IN:9492	14501	BM - A bug in the Project Brief which caused thumbnail graphics to be cut off has been fixed.	
IN:10071		BM - A bug in the Project Brief which caused users to be able to import active components into a disabled SKU has been fixed.	
IN:10284		BM - An enhancement to the Project Brief which adds a tooltip to the remove icon in the Project Overview has been made.	
IN:9666	14991/ 16185	BM - An enhancement to the Project Brief which allows users to search all types in File Selectors and Phrase Selectors has been made.	
IN:9669	14990	BM - An enhancement to the Project Brief which increased the size of asset thumbnails has been made.	
IN:9547	14534	BM - An enhancement to the Project Brief which persists default field Types and Sub Types to the Upload New Asset and Create New Phrase modals has been made.	
IN:9682	15073	BM - An enhancement to the Project Brief which separates individual barcode field changes into multiple entries has been made.	
IN:9890	14046	BM - An enhancement to the Project Brief which shows template names in the PIT has been made.	
IN:9423	14433	BM - An enhancement to the Project Setup and Project Brief which allows user to select Regions and Countries using a double click and enabling the list to retain ordering has been made.	
IN:9426	14535	BM - An enhancement to the Project Brief which separates PIT features from 'Add items' into individually accessible features has been made.	
IN:9427	14536	BM - An enhancement to the Project Brief to change the 'View Project Overview' button to better reflect its action has been made.	
IN:9428	14537	BM - An enhancement to the Project Brief has been made to reposition the 'Show Stale Data' toggle to improve user experience has been made.	
IN:9667	14992	BM - An enhancement to the Project Brief which allows users to search, and filter Region and Locale selector has been made.	
IN:9819	15411, 15376	BM - A bug in the Project Brief which caused an error to occur when making a new selection of a Master Phrase and Populating Translations has been made.	
IN10014	15727	BM - An enhancement to the Project Brief which changes a field name in the Review Brief to 'Select Document Template' has been made.	
IN:10094	15728	BM - A bug in the Project Brief Phrase Selector title which caused the word 'Set' to appear has been fixed.	

IN:10124	16098	BM - A bug in the Project Brief which caused any barcodes with trailing white space to fail to generate has been fixed.	
IN10242	16392, 16328	BM - A bug in the Project Brief which caused the Contents And Patent List Processor to fail has been fixed.	
IN:10246	16394	BM - A bug in the Project Brief which caused the menu to become unresponsive after importing Components has been fixed.	
IN10299	16801	BM - A bug in the Project Setup which caused an error to occur when deselecting the Import Checklist has been fixed.	

Factory Labelling

RQ / IN	nService	Description	
IN:9617	14970	FL - A bug in Factory Labelling which caused an error when Packaging Level Ratios were set to zero has been fixed.	
IN:10322		FL - An enhancement to Factory Labelling to make better use of the available screen real estate has been made.	
IN:10323		FL - An enhancement to Factory Labelling whereby additional optional configuration has been added which enables the automatic bypass of the Label Review screen has been made.	
IN:10324		FL - An enhancement to Factory Labelling Preview and Print screen to make better use of available screen real estate and improve user experience has been made. This also includes the removal of the 'Sample Qty' field to utilise screen real estate. The Print Sample Label(s) button will now request 1 Sample Label with every execution.	
IN:10111	14531	FL - An enhancement to Factory Labelling supporting tools which logs print requests leaving Veraciti has been made.	
IN:10315		FL - An enhancement to Factory Labelling which makes the whole asset card on the Search Results page act as a link to load this label for printing has been made.	
IN:10114	11821, 12495	FL - An enhancement to Factory Labelling which now displays an overview of Print Proxy status information in the Print Proxy JMX status page on a clients local print proxy server has been made. This needs to be deployed on a per-proxy basis and will be coordinated by the Kallik Support team.	
IN:10047	16017	FL - A bug in Factory Labelling which caused an error when print requests were too large has been fixed. A limit of 20,000 labels per print request has been introduced and a warning is displayed to the user if more than 20,000 labels are requested.	

Claims Substantiation Manager

RQ / IN	nService	Description	
IN:10013	15790	OM - A bug in the Claims Substantiation Manager which caused symbols to be incorrectly displayed in approved PDFs has been fixed.	
IN:9435	14288	OM - An enhancement to the Claims Substantiation Manager which shows there are notes to view against an ingredient has been made.	

IN:10458	17024	OM - A bug in the Claims Substantiation Manager which caused long claims to be truncated has been fixed.	
IN:10479	17216	OM - A bug in the Claims Substantiation Manager which caused notes from a previous claim to persist when a user navigates to another claim has been fixed.	

Project Batch Processor

RQ / IN	nService	Description	
IN:10093	16010	PBP - An enhancement to the Project Batch Processor which incorporates the validation stage in the progress bar display has been made.	
IN:10232	16188	PBP – An enhancement to the Project Batch Processor which adds caching to the 'Asset Exists' and 'Phrase Exists' checks which are run during the import.	

Phrase Manager

RQ / IN	nService	Description	
IN:9969	15601	PM - A bug in the Phrase Manager which caused translations that are not out of sync to be included in the export out of sync translations function has been fixed.	
IN:9791	15298	PM - A bug in the Phrase Manager which caused users to be able to import phrases containing apostrophes has been fixed.	
IN:9564	14629	PM - A bug in the Phrase Manager which caused the system to fail to show associated Subtype when Searching Types has been fixed.	
IN:9594	14825	PM - A bug in the Phrase Manager which caused the 'Add' button to become unresponsive when Importing Phrases in Internet Explorer has been fixed.	
IN:9919	15446	PM - A bug in the Phrase Manager which caused an error to occur when exporting a large number of Phrases has been fixed.	
IN:9903	15623	PM - A bug in the Phrase Manager which caused ampersands to be displayed as '&' when exporting Phrases has been fixed.	

Rules Engine

RQ / IN	nService	Description	
IN:10329		RE - A bug in the Rules Engine which caused invalid barcode types in rules to not show an error has been fixed.	

Service Integrator

RQ / IN	nService	Description	
IN:10189	16040	SI - A client specific bug in the Service Integrator which caused the MDR Project Exporter to encode the XML export incorrectly has been fixed.	

IN:10240	16040	SI - A customer specific bug in the Service Integrator which caused the MDR Project Exporter to provide incorrect dates within the XML export has been fixed.	
IN:10537	16395	SI - A customer specific bug in the Service Integrator which caused the MDR Project Exporter to miss data within the XML export has been fixed.	

Workflow Manager

RQ / IN	nService	Description	
IN:9401	14218	WM - A bug in the Workflow Manager which caused a user to see a previous batch review screen when re-entering batch review has been fixed.
